PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building 3+ scalable web applications using React.js, Node.js, Express.js, MongoDB, and Django. Skilled in developing RESTful APIs, implementing JWT-based authentication, and designing responsive user interfaces. Strong understanding of modern web development, API integration, and performance optimization.

TECHNICAL SKILLS

Frontend Development:

HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Responsive Web Design

Backend Development:

Node.js, Express.js, Django, RESTful API Development

Database Management: MongoDB

Tools & Technologies:

Git, GitHub, Visual Studio Code, Postman, NPM

Core Concepts:

Authentication (JWT), CRUD Operations, MVC Architecture, API Integration

PROJECT EXPERIENCE

E-Commerce Web Application (Django)

GitHub: <https://github.com/Jay6291/Onlineshopping>

- Deployed a full-stack e-commerce platform using Django with product listing, cart, and order management features.
- Established secure authentication and authorization to protect user accounts and transactions.
- Designed a responsive UI for mobile and desktop devices, improving usability by 30%.
- Built database models and CRUD operations to manage 50+ product entries efficiently.

Technologies: Django, HTML5, CSS3, JavaScript

News Monkey – News Web Application (React.js)

GitHub: <https://github.com/Jay6291/News-Monkey>

- Built a dynamic news application using React.js with real-time API integration
- Implemented infinite scrolling and reduced unnecessary API calls, improving performance by 35%.
- Designed category-based filtering for better content navigation
- Fetched and displayed live news content supporting 100+ news articles per session.

Technologies: React.js, JavaScript, HTML5, CSS3

Notebook – MERN Stack Notes Application

GitHub: <https://github.com/Jay6291/TextUtils>

- Developed a secure notes management system using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented JWT-based authentication for secure login and access
- Architected and developed 10+ RESTful APIs for user and notes management.
- Engineered full CRUD operations for notes and performance-tuned MongoDB queries, reducing response time by 25%.

Technologies: MongoDB, Express.js, React.js, Node.js

EDUCATION

Bachelor of Computer Applications (BCA)

Kanpur Institute of Technology, Kanpur

2023 – 2026

Current CGPA: 8.0 / 10

Senior Secondary (Class XII – Science)

UPMSP Board

Year: 2023 | Score: 84%

Secondary (Class X)

UPMSP Board

Year: 2021 | Score: 80%

TRAINING

Django Development Training

RCPL, Kanpur

- Gained hands-on experience in backend development using Django

- Worked on authentication systems, RESTful APIs, and database integration
-

ADDITIONAL INFORMATION

- Proficient in using Git for version control and collaborative development
- Built multiple responsive and scalable web applications
